Your cooking made clever: **One lid. Four possibilities. WMF Function 4**

FUNCTION 1

#### Tightly sealed

Energy-saving and low-water cooking? It's no problem with the closed lid position!

FUNCTION 2

#### For rice and other fine foods

The small sieve opening is perfectly suited for straining off rice – not a single grain passes through.

FUNCTION 3

#### For potatoes and other vegetables

Cooking water can be drained off safely and easily through the large sieve – potatoes or pasta stay in the pot.

FUNCTION 4

#### Bring on the water!

If liquid needs to be drained off completely, simply twist the lid until it is in the open position.
